EDUCATION

Kalinga Institute of Industrial Technology (DU) , Bhubaneswar, Odisha, India	2020 - 2024
Bachelor Of Technology, Electronics and Telecommunication Engineering	
>7.00 CGPA	
Scaler Academy , Bangalore, Karnataka, India	2024 - 2026
Advanced Computer Science Engineering Program	

ACCOMPLISHMENTS

- Secured a certificate for Advanced DSA from Scaler ([link](#))
- Secured a certificate for DBMS and SQL from Scaler ([link](#))
- Achieved 5 star rating in HackerRank for coding in Java.

PROFILES

- > **Github:** [Link](#)
- > **leetcode:** [Link](#)
- > **Scaler:** [Link](#)
- > **HackerRank:** [Link](#)

SKILLS

- > Data structures, Algorithms
- > Java, JavaScript, HTML, CSS
- > APIs, REST APIs
- > Spring, Node.js, React.js, Express.js
- > MySQL, Databases, PostgreSQL
- > RAG, LangChain, VectorDB
- > Docker, GitHub, Vercel, CI/CD
- > Large Language Models(LLMs)
- > Object-oriented Programming
- > Microservices, DevOps
- > Problem-solving, Software testing

WORK EXPERIENCE

- > **Lead SDE Intern at TechMaa** January 2026 - March 2026
 - Led the intern team and architected the **AI Career Co-pilot**, by leveraging **LLMs and Retrieval-Augmented Generation (RAG)** to **analyze** resumes and **generate personalized career recommendations**.
 - Gained user activity from a few hundred to **10,000 users** visiting the AI Career Co-pilot in just **7 days**.
- > **SDE Intern at TechMaa** November 2025 - December 2025
 - Architected a **RAG based AI Chat-bot** enabling **semantic search** across **1,000+ documents** which in turn improved response generation speed by **30%**.

PROJECTS

- > **AI Resume Co-pilot (AI Powered Resume Analyzer and Generator)** [Live Demo](#)
 - Architected an **AI powered Resume Analyzer and Generator** which **generates** an **ATS score** for a resume **based on the job description** and also **generates a resume** for a particular job description using basic details like name, skills, experience and projects.
 - This AI Resume Co-pilot **reduces manual review** by **70%**, and **achieves 85% accuracy** in **resume-job alignment scoring**.
 - Created the project using OpenAI SDK for the LLM, Render for the API hosting the backend, and Vercel for the frontend.
 - Tech stack used — **React | Tailwind CSS | jsPDF | Node | Express | OpenAI SDK**
- > **Core-X (AI Based Payments, Travel, Dining, Offers and Expenses App)** [Live Demo](#)
 - Built an app that **turns a traditional card app** to a **smart agentic, personalized, real-time financial assistant** which **increases trust, member convenience and member personalized offer/reward engagement**.
 - Provides **fragmented journeys** across features like **cards, offers, rewards, and concierge** instead of one guided interface.
 - This app **uses intent then decision and then explanation**, so that **actions** are **policy-aware**, and **reduces the hassle of manually filling up expense details** by **reducing manual effort** and this is **reduced by uploading receipts by scanning them** and the system **auto-extracts the information by itself**.
 - Tech stack used — **React + Vite | Express | Node | PostgreSQL | OpenRouterAI SDK**
